<RAPID7 HEALTH CHECK>

</90-MINUTE HEALTH CHECK>

In just 90 minutes, you will get a clear picture of the health of your Rapid7 environment. Our Security Consultant performs a quick and thorough check and gives practical recommendations. So you get the most out of your software and ensure that your environment is is optimally protected against cyber threats. Fast, effective and hassle-free.

RAPID7

</HOW IT WORKS?>

You choose in advance which Rapid7 product you want to have Checked. We then schedule a remote session, during which our Security Consultant guides you step by step through the tooling. Together, we analyse the current settings and discover where optimisations are possible.

</WHAT IT DELIVERS?>

- A clear report with concrete points of interest and practically applicable advice per product and component.
- The expertise of our specialists, tailored to your environment, so you can start making improvements right away..

</WHAT IS NEEDED?>

For this health check, we only have a sparring partner with with administrator access to the Rapid7 software during the remote session.
